

Use of Symlin and Byetta In Diabetes

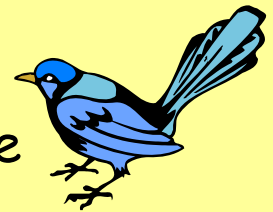

Andrea Hawkinson, MS, RD, LD, CDE

Thursday, May 4, 2006

12:00-1:30 (CST) Audioconference

1:30 (CST) Spring Meeting

Limited number of Audio Sites available. Call

Mary Haan @ 605-322-8998 to Register

Goal: Increase the knowledge of diabetes practitioners regarding the role of Symlin and Byetta in the management of diabetes.

RN and RD continuing education CEUs are being applied for.

BYETTA is an injectable medicine and comes in a prefilled pen with simple, fixed dosing for all patients.
